

COLIN O'NEILL

INTERACTION DESIGNER

CSYONEILL.COM

OBJECTIVE

I'm a multi-disciplinary Interaction Designer and pride myself on my adaptability to work in any type of environment. I have a deep interest in interactivity as a narrative experience. I use research, collaboration and prototyping to inform my design sense and love learning on the fly. I have always had a vested interest in technology and its applications to ease or enhance the quality of an interaction, so I've taken this to heart in my design sense. I have experience in many different environments including film, game design and UX, and would love to use some of these skills as a part of your team.
